
SafeSpeak Platform – Critical Gaps & Required Fixes

AI Avatar Not Moving

AI Avatar currently **is not animated or moving**, even though it was discussed that the avatar should be **interactive and animated**.

This needs to be fixed so the **AI assistant appears active and responsive** to the user.

Critical Gaps Requiring Immediate Action

1. Missing Safety-First Elements (CRITICAL)

Scope Requirement:

Every interaction must begin with safety prompts.

Missing from Landing Page

- “If you are in immediate danger, call **000 now**” prompt
- “If it's safe, contact **1800RESPECT (24/7)**” button
- **Quick Exit button** (visible on every screen)
- **Emergency contact access**

Fix Required

Add **prominent, fixed-position safety buttons** immediately upon page load.

2. Trauma-Informed Design Gaps

Scope Requirement:

Trauma-informed, gentle user experience.

Current Issues

- Generic “**Login**” CTA instead of supportive language
- Potential **information overload** without progressive disclosure
- No visible **consent gates or privacy-first messaging**

Recommended Changes

- Change “**Login**” → “**Begin Safe Report (Anonymous)**”
 - Add “**Your privacy is protected**” messaging
 - Implement **progressive disclosure** for content
-

3. Accessibility & WCAG Compliance

Scope Requirement:

WCAG 2.1 AA compliance for vulnerable users.

Test Immediately

- Keyboard navigation (**Tab / Shift + Tab flow**)
 - Screen reader compatibility (**NVDA / VoiceOver**)
 - Focus indicators and high contrast
 - Alt text on all images
 - Semantic HTML structure
-

Safety Gates (Required Implementation)

Add a **fixed header** with:

- **Emergency: Call 000** (red button)
 - **Safe Support: 1800RESPECT** (blue button)
 - **Quick Exit** (closes all tabs instantly)
-

CTA Updates

Update all call-to-action labels:

- Login → **Start Secure Report**
 - Add **benefit-driven** descriptions
 - Include **privacy assurances**
-

Accessibility Compliance Requirements

- Implement **proper focus management**
 - Add **ARIA labels** and semantic HTML
 - Test with **screen readers**
 - Ensure **full keyboard operability**
-

Content Optimization

- **Progressive disclosure** for information sections
 - Plain language review (**8th-grade reading level**)
 - Cultural sensitivity audit
-

Performance & UX

- Page load optimization (**< 3 seconds**)
 - Mobile-first interaction testing
 - **Language switcher UX improvement**
-

Hero Section Enhancement

Current

Generic welcome message.

Recommended

Headline:

“Report Racism Safely & Anonymously”

Subtext:

“Your voice matters. Your privacy is protected.”

Value Ladder Implementation

Create a **clear user journey**:

1. **Learn** → “Understand your options”
 2. **Document** → “Secure evidence vault”
 3. **Connect** → “Route to the right support”
 4. **Impact** → “Anonymous insights for change”
-

Trust Signals

Display clearly:

- “No data stored without consent”
 - “Australian privacy-protected”
 - “Trauma-informed design”
 - “8 languages supported”
-

Web App Dashboard Issue

The **dashboard** currently violates **SafeSpeak’s** core design principle.

According to the specification:

“Every interaction begins with:

‘If you are in immediate danger, call 000 now.

If it's safe, contact 1800RESPECT (24/7).”

Current Reality

Users land directly on the **dashboard without any safety prompts**.

Risk

This potentially **puts vulnerable users at risk** by not following trauma-informed design principles.

WCAG 2.1 AA Compliance

Accessibility compliance does **not appear fully implemented**.

Color Psychology for Safety

/ Trauma-informed color palette */*

```
:root {  
  
  --safety-red: #DC2626;    /* Emergency actions */  
  --trust-blue: #2563EB;    /* Support services */  
  --calm-neutral: #F8FAFC;  /* Primary background */  
  --warm-gray: #6B7280;    /* Secondary text */  
  --hope-green: #059669;    /* Success and progress */  
  --danger-orange: #EA580C; /* Warning states */  
  
}
```

Typography Concern

The fonts used across the system appear **inconsistent**.
Font usage should be **standardized across the platform**.

Core Design Principles (Must Always Be Maintained)

- Safety-first user experience
 - Emergency help always available
 - Quick Exit for dangerous situations
 - Trauma-informed language throughout
 - Accessibility compliance (**WCAG 2.1 AA**)
 - Mobile-optimized safety features
-

Additional Functionalities (Backend Dependent)

Some features appear missing and may require **backend implementation**.

Features Explicitly Required in the Scope of Work

1. Safety Infrastructure (100% REQUIRED)

From Scope Section 4.1

“Safety Gate & Consent (must be implemented first)”

Exact Requirements

- “If you are in immediate danger, call **000 now**.”

- “If it's safe, contact **1800RESPECT (24/7).**”
- Buttons:
 - **Emergency Call (000)**
 - **1800RESPECT Call**
- **Quick Exit**
 - Persistent button
 - Instantly switches UI to a neutral app (example: calculator)

Final Acceptance Criteria

Safety gate and Quick Exit must be **functional and tested across platforms.**

2. AI Legal Triage (100% REQUIRED)

Feature Set Overview

AI Legal-Aware Triage (Australia specific – informational only)

Section 4.3 – Understand (Non-Legal Rights/Info)

Features must include:

- AI-driven explainers by jurisdiction
- Phase 1 focus: **NSW law specifics**

Example:

- NSW racial hatred offence explained in **plain language**

Conversational Q&A

Users can:

- Ask questions in their own words
- System classifies the issue
- Suggests lawful pathways and support options

Every response must include:

“This is information only, not legal advice.”

3. Smart Dialler (100% REQUIRED)

Feature Set Overview

Smart Dialler with:

- Emergency / non-emergency calling
- Interpreter guidance
- Covert mode

Section 4.4 – Call (Smart Dialler)

Features include:

- Location-aware numbers
 - 000
 - Police Assistance Line
 - 1800RESPECT
 - Lifeline
 - Multicultural helplines
 - University / school contacts

Call Preparation

Generate **20-30 second call scripts** in the user's language.

Include instructions:

“Ask for an interpreter in [language]”

Silent / Covert Assistance

Provide instructions for requesting **silent help** if supported.

4. Evidence Vault Security (100% REQUIRED)

Section 4.0 – Foundational Features

Local-first encrypted evidence vault.

- Uses **device keystore**
- Cloud sync **optional**

Section 4.2 – Evidence Vault

- Evidence stored locally (encrypted)
- Cloud sync only with user consent
- Stored in **Australian region cloud**

Chain of Custody

For each asset:

- SHA-256 hash generated
- Timestamp recorded
- Immutable signed audit log stored

Data Model

```
EvidenceAsset {  
  id  
  type  
  storage_pointer  
  sha256_hash  
  uploaded_at  
  metadata  
}
```

Deletion request must remove asset and update metadata.

5. Cultural Sensitivity (100% REQUIRED)

Section 4.0 – Foundational Features

Users can select:

- Cultural profile
- Faith profile
- Community background

Content adapts based on the profile.

UX, Accessibility & Localization

Content must adapt for:

- Faith
 - Culture
 - Community services
-

Admin Console Requirements

Admin must be able to manage:

- Taxonomies
 - Language packs
 - Destinations
 - Content
 - Cultural profiles
-

Cultural Adaptation Examples

- Faith-appropriate service matching
 - Cultural context awareness in AI responses
 - Routes to community organizations
 - Example: Islamic Council
 - Faith-appropriate legal support
-

The Bottom Line

All the following features are **100% required by the scope document**:

1. Safety Infrastructure
 2. AI Legal Triage
 3. Smart Dialler
 4. Evidence Vault Security
 5. Cultural Sensitivity
-

SafeSpeak Final User Menu

Dashboard / Home

Emergency Actions (Always Visible)

- 000 Emergency (Red button)
- 1800RESPECT (Blue button)
- Quick Exit (persistent top-right)

My Activity Summary

- Draft reports count
- Submitted reports status
- Recent ScamShield checks
- Last safety check timestamp

Quick Actions

- Report New Incident
- Check for Scams
- Find Support
- Learn Something New

Personalized Recommendations

- Based on cultural profile
 - Micro-education cards
 - Nearby community resources
 - Contextual safety tips
-

Report Incident

Pre-Report Safety Check

- Safety confirmation prompt
 - Quick Exit reminder
 - Covert mode option
 - Continue / postpone choice
-

Evidence Collection Hub

- Text input (8 NSW languages)
 - Audio recording with transcription
 - Visual evidence (photos / screenshots)
 - Document upload (PDF / DOC / email)
 - Encrypted evidence vault
-

AI Incident Analysis

- Smart field extraction
 - Who / What / When / Where / How
 - Intelligent triage
 - Confidence indicators
 - User review and edit
-

Smart Routing Engine

Recommended destinations:

- NSW Police
- Anti-Discrimination NSW
- eSafety
- Legal Aid

Features:

- Destination previews
 - Consent management
 - Submission tracking
-

ScamShield

Input Methods

- Text analysis
 - Screenshot OCR
 - Email analysis
 - Link checker
-

AI Analysis Engine

- Scam probability score (0-100%)
 - Red flag detection
 - Pattern recognition
 - Behavioral analysis
-

Action Center

- Personalized recommendations
 - Pre-filled reports
 - ACCC Scamwatch
 - ACSC ReportCyber
 - Privacy protection tools
 - Educational resources
-

Get Support

Emergency Support

- 000
- 1800RESPECT
- Lifeline
- Kids Helpline

Includes **Smart Dialling with scripts.**

Legal Support

- Legal Aid NSW locator
 - Community legal centres
 - Pro bono services
 - Court support resources
-

Community Support

- Cultural / faith organizations
 - Multicultural services
 - Advocate matching
 - Specialized support
 - Youth
 - Seniors
 - LGBTI+
 - Disability
-

Learn & Resources

Micro-Education Cards

- Legal knowledge
- Youth guidance
- Workplace issues
- Online safety

- Scam prevention
-

Interactive Learning

- Multimedia content (8 languages)
 - Accessibility features
 - Cultural adaptations
 - Progress tracking
-

Resource Library

- Templates
 - Directory services
 - Local resources
 - Government links
-

My SafeSpeak

Profile Management

- Language & cultural settings
 - Device preferences
 - Security settings
 - Usage analytics
-

Privacy & Consent Dashboard

- Consent management
 - Data export / deletion
 - Access history
 - Legal rights information
-

My Reports Center

- Draft management
 - Submission tracking
 - Update / withdraw reports
 - Impact dashboard
-

Advanced Settings

- Safety configuration
 - Technical settings
 - Integration management
 - App behavior controls
-

Persistent Elements (On Every Screen)

- Quick Exit button
 - Emergency access (000 / 1800RESPECT)
 - Language switcher
 - Covert mode indicator
 - Safety disclaimer
-
